WORK EXPERIENCES

MICROSOFT

Noida, India

Software Engineer II – Performance & Reliability Team, Microsoft Word Web

September 2022 - July 2025

- Partnered with cross-geo product and design teams to analyze telemetry across top 100 most used actions in Word Web by 125M+ users and improved their performance by 15%, driving a 23% increase in monthly usage.
- Spearheaded the creation of an LLM + RAG powered “Playwright Copilot” agent that could search, analyze gaps, and generate accurate automated tests for Word, increasing code coverage by 22%, enhancing developer productivity by 90% and reducing monthly regressions by 30%, winning 1st place at Microsoft’s FHL hackathon.
- Re-architected Word Web’s real-time collaboration stack to boost co-authoring speed by 25%, impacting 750 million co-authoring transactions from 50 million users annually, and additionally reduced save failures by 16%.
- Proposed, designed, and developed a data-driven experimentation system using usage metrics and confidence scoring to predict performance regressions, preventing production issues by 20% and improving app stability.

Software Engineer – Lists & Immersive Reader Team, Microsoft Word Web

April 2021 - August 2022

- Improved user ratings by 15%, driving a 2% increase in MAU, by partnering with PMs to A/B test “Bullets & Lists” enhancements informed by user feedback, usage telemetry, and online trends from 10M+ daily interactions.
- Launched the integration of Immersive Reader into Word Web, working closely with the EDU team to help schools make education more accessible for diverse learners, resulting in the acquisition of 250K+ new EDU customers.
- Collaborated cross-functionally with PMs, designers and engineers across PowerPoint, Outlook & MS Teams to launch Microsoft Loops integration in Word Web, enabling 1.1M users to collaborate seamlessly across Office 365 products.
- Spearheaded an org-wide migration to strict TypeScript null checks, orchestrating efforts across 60+ engineers to proactively eliminate 1,800+ runtime errors in production, saving an estimated \$1.5M annually.

ADOBE SYSTEMS

Noida, India

Member of Technical Staff – Forms Team, Adobe Experience Manager (AEM)

August 2020 - April 2021

- Facilitated the launch of our client Sony’s PlayStation 5 website by building high-traffic signup and order forms that successfully scaled up to 2 million orders within 24 hours of launch, generating nearly \$1 billion in revenue.
- Delivered and shipped top user-requested AEM Forms features used by 270K+ users generating \$300M annually.

AFFABLE.AI

Remote, Singapore

Fullstack Software Engineer – Influencer Analytics Dashboard Team

February 2020 - July 2020

- Led end-to-end integration of TikTok analytics into Affable’s Influencer Dashboard, helping brands find the most relevant creators for their ad campaigns, and track their campaign performance across multiple social media.
- Developed a high-speed automation pipeline that secured one of our largest client deals worth \$200K in revenue, by delivering analytics of 100K most-requested social media influencers within a month’s time.
- Reduced database costs by 50% saving \$60K/year by speeding up database queries in our analytics pipeline by 10x.
