WORK EXPERIENCES

MICROSOFT

Software Engineer II – Performance & Reliability Team, Microsoft Word Web September 2022 - July 2025

- Built an LLM-powered Playwright coding agent that generated TypeScript E2E tests from developer prompts using RAG, tool-calling, and iterative validation against repo-specific helpers. Won 1st place at Microsoft FHL Hackathon.
- Built production automation infrastructure for Word Web, including feature-flag workflows, dashboards, and alerting systems that reduced production incidents by 20%.
- Improved latency across Word Web's top 100 actions for 125M+ users by combining browser profiling, DevTools traces, telemetry analysis, and targeted frontend optimizations.
- Re-architected the real-time co-authoring stack of Word Web with its native client, by replacing legacy graph-backed caching with piece-tree implementations, Redis caches and in-memory optimization, resulting in increase in co-authoring speeds by 25%, and reducing save failures by 16% across 750M annual transactions.

Software Engineer – Lists & Immersive Reader Team, Microsoft Word Web April 2021 - August 2022

- Built word editor features using TypeScript, React, Redux, C#/.NET, and Rust/WASM shared across Word Web and native clients, contributing to a 15% improvement in user ratings and 2% MAU growth from 10M+ daily interactions.
- Shipped Immersive Reader integration for Word Web and contributed to Microsoft Loop collaboration flows, expanding accessibility and cross-product editing experiences for education and Microsoft 365 users.
- Collaborated cross-functionally with PMs, designers and engineers across PowerPoint, Outlook & MS Teams to launch Microsoft Loops integration in Word Web, enabling 1.1M users to collaborate seamlessly across Office 365 products.
- Spearheaded an org-wide migration to strict TypeScript null checks, orchestrating efforts across 60+ engineers to proactively eliminate 1,800+ runtime errors in production, saving an estimated \$1.5M annually.

ADOBE SYSTEMS

Member of Technical Staff – Forms Team, Adobe Experience Manager (AEM) August 2020 - April 2021

- Developed and shipped enterprise workflow features for Adobe Experience Manager Forms used by 70K+ users, combining Java, jQuery, and TypeScript to support high-volume document and form automation.
- Contributed to high-scale signup and order flows used during the PlayStation 5 launch, supporting traffic associated with 2M orders in 24 hours, and helped modernize frontend code through TypeScript migration work.

AFFABLE.AI

Fullstack Software Engineer – Influencer Analytics Dashboard Team February 2020 - July 2020

- Led end-to-end integration of social media analytics into the Influencer Search Dashboard using Angular, Node.js, MongoDB, and Elasticsearch, helping brands find the most relevant creators for their ad campaigns across platforms.
- Designed a high-throughput scraping and analytics pipeline with BullMQ, Google Pub/Sub, and Cassandra to ingest and process data for 100K influencers within one month, helping secure a \$200K client deal.
- Reduced database costs by 50% saving \$60K/year by speeding up database queries in our analytics pipeline by 10x.

EDUCATION

UCLA ANDERSON SCHOOL OF MANAGEMENT

M.B.A., Full-Time Program, Technology Leadership & AI Specialization Aug 2025 - Present

- **Honors:** UCLA Anderson Merit Fellowship and Forte Ally Fellowship (80%)
- **Leadership:** VP of Enterprise Relations, Tech Business Association (AnderTech)

INDIAN INSTITUTE OF TECHNOLOGY, KANPUR

Bachelor of Technology, Electrical Engineering July 2016 - July 2020

- **Leadership:** Head of Tech, Student Executive Committee – Built automation systems that saved \$20,000 annually.
- **Extracurricular:** Student Guide & Academic Mentor at Student Counselling Service; Lead vocalist at Music Club

TECHNICAL SKILLS

- **Langs:** TypeScript, JavaScript, Rust, Java, C++, Python, Go • **DBs:** MongoDB, Cassandra, Elasticsearch, Postgres, Neo4j
- **Tools:** React/Angular, Node.js, Playwright, Kusto, Codex, Claude Code, OpenClaw, LangChain, browser perf profiler
